WhatsApp / Instagram (friends & network)	5
One-pager (what you send officers)	5
20-minute workshop — run-of-show (virtual over Zoom / Meet)	5

The play

Email or DM a club officer offering two things: (a) **free access** for all their members, and (b) an optional **free 20-minute demo** at one of their meetings (virtual works) where members build their proof-backed resume live. That single workshop gives you a room of ideal-customer users *and* live feedback in one sitting. Your unfair advantage: you’re a student too — so this reads peer-to-peer, not vendor-to-club. Lead with that.

Honest expectations

- **Send ~30–36.** Response rates are low (~5–15%), so personalize every one: club name plus one specific detail.
- **Expect 1–3 yeses.** That’s plenty — one workshop can be 15–30 users.
- **It’s a 1–3 week play.** Officers reply slowly. Start it now, but use the faster channels (below) for results *this* week.

- **Follow up once**, 4–5 days after the first message, then move on.
- **Mind timezones**. A US-evening workshop is India-morning — workable.

How to find a club's officer

For each target: (1) Google “[*university*] ACM” or “[*university*] computer science club”; (2) check the school’s student-org portal (Engage / Presence / CampusLabs) for a contact email; and — most reliably — (3) search **LinkedIn** for “[*University*] ACM president” or the club name and message the officer directly. Officers reply faster than a generic club inbox. Their Instagram or Discord usually lists a contact too. Never guess an email; the search always finds the current, real person.

Target clubs (36)

Tier A — High-priority public schools (hungry, less flooded than elite schools)

School / Org	Club / org	Pri	How to find the officer
Rutgers University	USACS (Undergrad Student Alliance of CS)	High	usacs.rutgers.edu; IG @rutgers_usacs; LinkedIn “Rutgers USACS eboard” (runs weekly member workshops — ideal)
UT Dallas	ACM UTD	High	cs.utdallas.edu (CS orgs page); IG @acmutd; runs HackUTD
Arizona State (ASU)	SoDA (Software Developers Assoc.)	High	IG @asu.soda; Google “ASU SoDA officers”
San Jose State	Software & Computer Eng. Society	High	Google “SJSU SCE club”; club email
University of Florida	Open Source Club @ UF / ACM	High	Google “UF Open Source Club” / “UF ACM”
Ohio State	Open Source Club @ OSU	High	Google “OSU Open Source Club”; LinkedIn officer
Texas A&M	Aggie Coding Club	High	Google “Aggie Coding Club”; IG; LinkedIn
Purdue University	Hackers @ Purdue	High	Google “Hackers at Purdue”; LinkedIn
University of Houston	CougarCS	High	Google “CougarCS”; IG @cougarcs; club email
Georgia State	ACM Student Chapter	High	Google “Georgia State ACM”; LinkedIn
Univ. of Illinois Chicago	ACM @ UIC	High	Google “UIC ACM”; LinkedIn
Cal State Fullerton	ACM @ CSUF	High	Google “CSUF ACM”; LinkedIn
Cal State Long Beach	ACM / CS clubs @ CSULB	High	Google “CSULB ACM”; LinkedIn
University of Cincinnati	ACM @ UC	High	Google “Cincinnati ACM” (famous co-op program = resume-hungry)
San Diego State	CS clubs @ SDSU	High	Google “SDSU computer science club”
UT Arlington	ACM @ UTA	High	Google “UTA ACM”; LinkedIn
Florida Intl University	ShellHacks / CS clubs	High	Google “FIU ShellHacks” / “FIU CS club” (large Hispanic-serving school)

School / Org	Club / org	Pri	How to find the officer
Local community colleges	CS / coding clubs	High	Google “[city] community college CS club” (very receptive)

Tier B — Hackathon-driven / strong CS

School / Org	Club / org	Pri	How to find the officer
UCF (Central Florida)	Knight Hacks	High	knighthacks.org; IG @knighthacks (700+ hackathon crowd)
Penn State	Nittany AI / ACM @ PSU	Med	Google “Penn State ACM” / “Nittany AI”
Michigan State	Spartan Hackers	Med	Google “Spartan Hackers”; LinkedIn
University of Minnesota	ACM-UMN	Med	Google “ACM UMN”; LinkedIn
Stony Brook	HopperHacks / CS clubs	Med	Google “Stony Brook CS club” / “HopperHacks”
NC State	CS clubs / hackathon	Med	Google “NC State CS club”
University of Maryland	Bitcamp / ACM	Med	Google “UMD Bitcamp” / “UMD ACM”
Univ. of Wisconsin-Madison	CS clubs	Med	Google “UW Madison CS club”
Univ. of Colorado Boulder	HackCU / CS clubs	Med	Google “HackCU” / “CU Boulder CS club”
UMass Amherst	HackUMass / CS clubs	Med	Google “HackUMass” / “UMass CS club”

Tier C — National multi-chapter orgs (one contact reaches many students)

Org	What it is	Pri	How to reach them
ColorStack	Black/Latinx CS students; 70+ chapters, 3,600+ members	High	colorstack.org/get-involved; wiki.colorstack.org (chapters)
CodePath	Career-readiness org partnered with many US colleges	High	codepath.org/higher-ed
Google Dev Student Clubs	GDSC US chapters; one lead = a whole campus	High	developers.google.com/community; LinkedIn “GDSC [school] lead”
Rewriting the Code	Women/nonbinary in tech; campus reps across US	High	rewritingthecode.org; LinkedIn “RTC campus ambassador”
Women in CS (WiCS)	Chapters at most schools; keen on career help	High	Google “[school] Women in CS”
MLH (Major League Hacking)	US collegiate hackathon network	Med	mlh.io; DM hackathon organizers
Girls Who Code	College Loops across the US	Med	girlswhocode.com (college loops)
Out in Tech U	LGBTQ+ students in tech, supportive chapters	Med	outintech.com

This week — faster channels (for feedback in the next few days)

Clubs are a 1–3 week play. Use these now to get feedback before college.

- **r/csMajors (Reddit)** — post offering *free resume reviews*; let it lead into feedback. Read the sub's rules; be value-first, not a pitch.
- **r/resumes, r/internships, r/developersIndia** — same value-first offer.
- **LinkedIn post** — announce the free tool and ask for 5 testers.
- **LinkedIn DMs** — message ~10 “Open to Work” US students / new grads (filter by school/location).
- **Dev / student Discords** — offer free resume help in the career / self-promo channels (The Coding Den, Programmer's Hangout, MLH, school servers).
- **Your network** — ask everyone “*know anyone job-hunting?*” and chase the referral chain.

Copy-paste templates

Replace the [brackets] and personalize one detail before sending.

Club email (first contact)

Subject: Free proof-backed resume tool for [Club] members

Hi [Name],

I'm Neha, a CS student building ResumeForge — a free tool that turns a student's GitHub into a proof-backed resume (every bullet links to the real project that proves it), plus interview prep. It's built for exactly your members heading into internship season.

I'd love to give all of [Club] free access — and if it's useful, I'm happy to run a free 20-minute demo at one of your meetings (virtual works) where members build their resume live.

Open to me sharing it with your members? I can send codes + a one-pager.

Thanks! — Neha, [link]

LinkedIn DM (when you find the officer)

Hi [Name] — I'm Neha, a CS student who built ResumeForge, a free tool that turns a student's GitHub into a proof-backed resume + interview prep. I'd love to give [Club] members free access, and I'm happy to run a quick 20-min demo at a meeting (virtual works). Open to me sharing it with the club? — Neha, [link]

Follow-up (4–5 days, no reply)

Hi [Name], quick follow-up on my note about free ResumeForge access for [Club] — no worries if it's not a fit! If it is, I can send member codes + a one-pager this week. Thanks!
— Neha

After a YES (lock the workshop)

Thanks [Name]! I'll send access notes for your members + a one-pager. For the demo I just need ~20 min at a meeting; members should bring their GitHub and a target role. What date works?

Reddit post (r/csMajors, r/resumes)

Title: I built a free tool that turns your GitHub into a proof-backed resume — happy to review resumes too

Body: I'm a CS student. I got tired of resumes full of claims you can't back up, so I built ResumeForge — it turns your GitHub into a resume where every bullet links to the real project that proves it, plus interview prep. It's free. Drop your resume or try it and I'll

give honest feedback — and I’d love 10 minutes of yours on the tool. [link]

WhatsApp / Instagram (friends & network)

Hey! I built a free tool that turns your GitHub into a proof-backed resume + interview prep. Looking for a few people job-hunting to try it and tell me what you think (10 min). I’ll help fix your resume in return. Want the link?

One-pager (what you send officers)

Paste this into a doc or Canva and attach it after a reply.

- **Headline:** ResumeForge — the proof-backed resume, free for [Club] members.
- **What it is:** Turns a student’s GitHub into a resume where every line links to the real project, README, or live demo that proves it — plus interview prep and a live mock interview.
- **Why members care:** Recruiters are drowning in AI-generated, look-alike resumes. A resume where every claim is verifiable stands out — and members can share one link recruiters can click through.
- **What [Club] gets:** Free access for all members; an optional free 20-minute demo at a meeting; free resume feedback.
- **How to get access:** Reply and I’ll send access notes + share it in your Discord/newsletter. Members just open the link and connect their GitHub.
- **About me:** Neha — a CS student (VIT Chennai) who built this. Student to student, not a company.
- **Contact:** [email] | [link] | [LinkedIn]

20-minute workshop — run-of-show (virtual over Zoom / Meet)

Goal: members build their **own** proof-backed resume live while you watch — that’s the feedback. Let them click; don’t just present.

Time	Segment	What you do
Before	Prep	Ask the club to have members bring their GitHub + a target role. Share the link in their Discord beforehand. Have one slide and your feedback form ready.
0–2 min	Hook	Who you are (a student, building this). Problem: AI resumes all look the same and can’t prove claims. Promise: a resume where every line has proof.
2–6 min	Live demo	Paste your GitHub, generate, open the Proof-Backed Resume, click a line, show the proof (repo / live demo). “This is what other tools can’t do.”
6–14 min	Hands-on (the gold)	Members open the link and build their own — generate, build the proof-backed resume, click their lines. Walk them through; watch where they get stuck. Note every hesitation.
14–17 min	The extras	Quickly show the shareable recruiter link, and Interview Prep / live Mock Interview.

Time	Segment	What you do
17–20 min	Ask + capture	Ask “What almost made you quit?” and “Would you use this for real applications?” Drop the feedback-form link + your contact. Offer free access. Ask for 2–3 volunteers for a 15-min 1:1 later.
After	Follow up	Send the link + feedback form to everyone. Message the 1:1 volunteers. Add their emails (with consent) to your list.

The magic moment is click-a-line then see-the-proof — make sure every member does it themselves.

Track your outreach as you go: mark each club Sent / Replied / Yes, follow up once, and keep adding schools from every referral. One yes is a room full of your exact users.
